

The Environmental Impact of Light Pollution and its Abatement

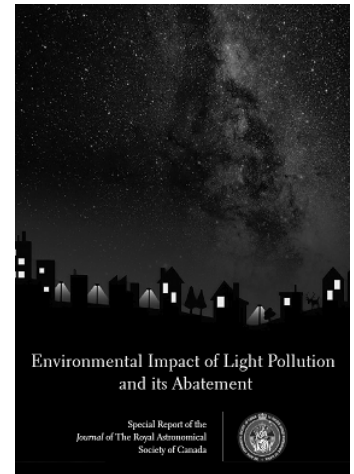

A Special Report from The Royal Astronomical Society of Canada

Our Mission

What are the causes of light pollution? What are the attached health risks? What techniques can we use to reduce these effects? This special issue will address these issues, as well as present the new technological, social, and political solutions to help us move toward a future with a more benign use of artificial light at night.

The Journal

Our report is included inside the December 2013 issue of the *Journal*, the bi-monthly publication of The Royal Astronomical Society of Canada. Now in its 107th year of publication, the *Journal* is devoted to the advancement of astronomy and allied sciences.

Single Copy Price Only \$6.95!
